

One material. Every element.

A complete glass system for JarvisPanel.
Softly layered. Clear in every state.

نظام واحد. حضور في كل تفصيلة.

Soft light On

Intensity 65

Comfortable

Compact

States respond locally; this is not a live workspace.

JarvisPanel · Glass System

Original lion. New material language.

Depth, without the distraction.

The scene gives glass its colour. Diffuse transparency, a fine illuminated rim and a soft shadow make every surface part of the same family—not a lens or a metallic finish.

Clear

Let the scene in.

Open, low-density compositions.
Never unprotected fine text.

Regular

A little separation.

Controls, navigation and floating surfaces.

Light sweep disabled

Quiet

Keep a clear head.

A denser layer for fields, tables and longer reading.

Opaque mode retains the same edges, hierarchy and colour roles, without background filters. It is an accessibility variant, not a different visual system.

Colour has a role.

Two scripts. One rhythm.

Ink

#090D13

Pearl

#F2EEE6

Ice

Structure

Navigation, content and data belong to the same world. Quiet is a density—not an exception.

UsageStatesAccessibility

Build from the same foundations.

Use shared tokens for material, shape, spacing, typography and state. Keep a visible label and a clear next action.

The state is part of the component.

Default, hover, pressed, focus-visible, selected, disabled, loading and invalid apply where the control supports them. Status combines text, shape and colour.

Use the keyboard, too.

Arrow keys move within this tablist. Home and End select its endpoints. These tabs are independent from the opening preview. RTL reverses horizontal arrow movement.

Included source files		
Local bundle, not live activity		
Asset	Format	Status
Design tokens	JSON	Approved
Component styles	CSS	Approved
Component manifest	JSON	Approved

Floating layers

Anchored, legible and dismissible. Depth explains the relationship without stealing attention.

Actions ...

Material details

Open dialog

Show toast

Open a layer. Use Escape or its close control to dismiss it.

Feedback

Explain what happened and what comes next.
Never rely on colour alone.

A clear place to start.

No note in this specimen yet. Try the local form to see the filled state.

Write a sample note →

Still unmistakably JarvisPanel.

The material expression.

Light, without a metallic finish.

The original lion geometry anchors the system. A soft pearl expression and a frosted enclosure carry the new material. Flat marks remain right for small sizes and print.

JarvisPanel

JarvisPanel names the platform and services.

Jarvis / جارفيس names the assistant.

Preserve original geometry and clear space: at least one quarter of the visible mark height. Use the flat mark below 64px. Never stretch or mirror.

A moment of light. Then, room to work.

A one-shot brand reveal with the same diffuse surfaces.
Nothing autoplays or blocks access to the interface.
Reduced motion uses a still image.

 JarvisPanel

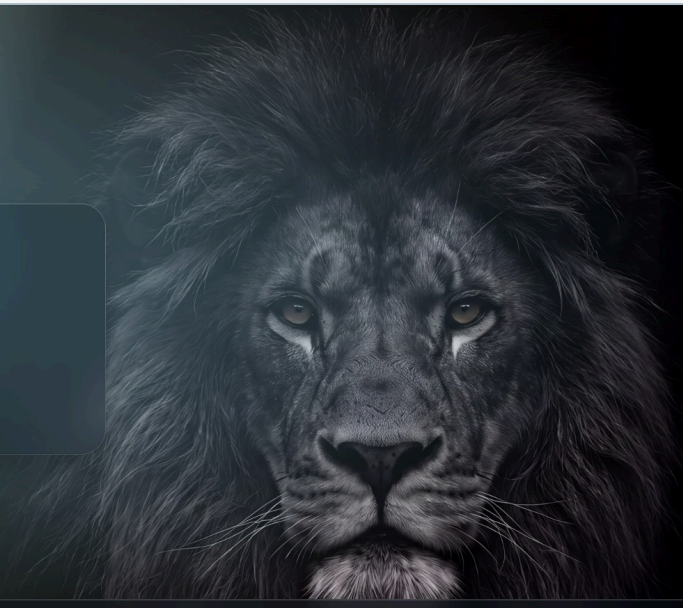

Presence,
in a new light.

Your platform for personal services.

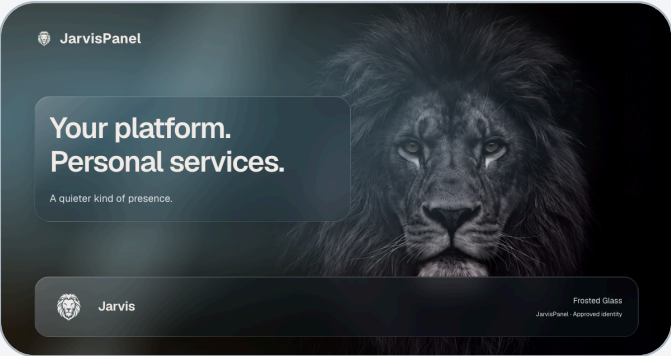

Jarvis

Frosted Glass
JarvisPanel · Approved Identity

Beyond the interface.

Social layouts, a presentation cover and a printable letterhead. Editable compositions use the same typography, material and quiet hierarchy.

A complete system.

A considered decision.

Approved by Yazeed on 3 October 2026. This is the current brand system; earlier versions are preserved separately in Legacy. Design approval does not imply a live service deployment.
